2015 Stanford Campus Climate Survey: Additional Findings

Introduction

Since the original publication of the <u>2015 Stanford Campus Climate Survey</u> in October 2015, the university has been working to conduct additional analyses of the data collected.

As the survey report stated, Stanford planned additional analyses in order to better understand variations in students' attitudes and experiences along various demographic and academic dimensions. In addition, the university has conducted further analyses to respond to specific questions that have been posed by faculty and students.

This package of analyses, recently completed, provides a series of additional tables supplementing those in the original survey report. The university is publishing these findings as part of its continuing effort to promote awareness of the prevalence of prohibited sexual conduct at Stanford and to expand education, prevention training, and response efforts. As in the original report, some results are suppressed in the following tables because of small numbers, in order to protect students' privacy. Specifically, prevalence rates are suppressed when they are based on the nonconsensual sexual contact experiences of three or fewer respondents.

The additional findings provided here continue to demonstrate that many students – far too many – have experienced prohibited sexual conduct at Stanford. The additional tables provide further information about groups and subgroups experiencing particular acts of nonconsensual sexual contact, as well as the tactics used to commit those acts.

As with the original survey report, these additional findings are intended to help guide further efforts at Stanford to promote a culture of respect and open dialogue among all members of the community, and to inform further actions ensuring the safety and wellbeing of all Stanford students.

May 2016

WARNING:

This material discusses sexual assault and other forms of sexual misconduct and relationship violence. Some of the questions in the survey, and some sections of the findings below, use explicit language including anatomical names of body parts and descriptions of sexual acts. Reading this report might remind you of experiences that you or someone close to you has gone through. If you would like to talk to someone confidentially about questions or concerns relating to sexual assault or other Prohibited Sexual Conduct, please contact one of the following resources:

Table of Contents

Nonconsensual Sexual Contact: Rates of Acts and Tactics by which Acts Were Accomplished
 Tables in this section display survey response frequencies of experiences of nonconsensual sexual contact and the tactics by which they were accomplished, by gender identity and degree level. These tables report responses to questions on the survey, independent of Stanford's prohibited sexual conduct policy categories.

2. Rates of Prohibited Sexual Contact

The tables in this section provide rates of certain combinations of nonconsensual acts and the tactics by which they were accomplished. Combinations of acts and tactics are grouped to simplify the results from Section 1. In Tables 2a (undergraduate) and 2b (graduate), respondents appear in every row indicated by their survey response. In Tables 2c (undergraduate) and 2d (graduate), responses are only counted in the first applicable row, and every respondent only appears in the table once.

3. Rates of Nonconsensual Penetration/Oral Sex (attempted or completed) through Force, Threat of Violence, or When the Respondent Was Asleep, Unconscious, or Unable to Resist or Respond; Disaggregated by Demographic and Academic Characteristics

Tables in this section show prevalence rates for respondents experiencing nonconsensual penetration and/or oral sex (attempted or completed) when the respondent indicated that at least one of three tactics were used: force, threat of violence, and/or when the respondent was asleep, unconscious, or unable to resist or respond. Prevalence rates are disaggregated by sexual orientation, race/ethnicity, class year (undergraduate only), survey respondents' participation in extracurricular activities (undergraduate only), and degree type (graduate only).

4. Total Rates of Prohibited Sexual Contact; Disaggregated by Demographic and Academic Characteristics

Tables in this section show the total combined prevalence rates for survey respondents experiencing any of the following: attempted and/or completed nonconsensual penetration and/or oral sex, completed nonconsensual sexual touching, and completed nonconsensual clothing removal when accomplished by unknown tactics, force, threat of violence, or when the respondent was asleep, unconscious, or unable to resist or respond. Prevalence rates are disaggregated by sexual orientation, race/ethnicity, class year (undergraduate only), survey respondents' participation in extracurricular activities (undergraduate only), and degree type (graduate only).

- 5. Perpetrator(s) Affiliation to Stanford and Relationship to Survey Respondent

 Tables in this section show survey respondents' answers to questions about the person(s) who committed prohibited sexual contact, for two different groups of prohibited acts.
- Nonconsensual Contact Accomplished Through Force, Threat of Violence, or When the Respondent Was Asleep, Unconscious, or Unable to Resist or Respond
 Tables in this section show prevalence of all nonconsensual contact (including kissing)

accomplished through three specific tactics (force, threat of violence, or when the respondent was asleep, unconscious, or unable to resist or respond). Rates are given by degree level and gender, and for undergraduate women in their fourth year and above.

- 7. Concerns about Sharing or Reporting Experiences of Nonconsensual Sexual Contact
 Survey respondents who experienced nonconsensual sexual contact were asked to indicate
 whether they had considered a list of common concerns about sharing or reporting their
 experiences. This table presents results for those experiencing nonconsensual penetration or
 oral sex separately from those experiencing sexual touching or clothing removal.
- 8. Experiences of Students with Disabilities

Tables in this section provide prevalence of prohibited sexual contact and responses to climate measures for students who self-reported on the survey that they have one or more disabilities.

Sections 9-11

Tables in sections 9-11 display responses to questions about perceptions of campus safety, the likelihood of the university holding accountable someone found responsible for sexual assault, and perceptions of peer support if the respondent were to report sexual harassment or assault. Responses are disaggregated by demographic and academic characteristics of survey respondents.

- 9. Perceptions of Safety and University Response to Sexual Assault Disaggregated by Race/Ethnicity
- 10. Perceptions of Safety and University Response to Sexual Assault Disaggregated by Gender Identity and Sexual Orientation
- 11. Perceptions of Safety and University Response to Sexual Assault Disaggregated by Graduate Degree
 Type

Sections 12-14

Tables in sections 12-14 display proportions of survey respondents who have witnessed homophobic and sexist remarks at Stanford, and proportions of survey respondents experiencing unwanted sexual attention. Responses are disaggregated by demographic and academic characteristics of survey respondents.

- 12. Witnessing Sexist Remarks, Homophobic Remarks, and Experiences of Unwanted Sexual Attention Disaggregated by Race/Ethnicity
- 13. Witnessing Sexist Remarks, Homophobic Remarks, and Experiences of Unwanted Sexual Attention Disaggregated by Gender Identity and Sexual Orientation
- 14. Witnessing Sexist Remarks, Homophobic Remarks, and Experiences of Unwanted Sexual Attention Disaggregated by Graduate Degree Type

Sections 15-17

Tables in sections 15-17 present responses to questions gauging perceptions of how much Stanford faculty care about survey respondents, how much of a sense of community respondents feel, and how much respondents can depend on their friends or peers for support. Responses are disaggregated by demographic and academic characteristics of survey respondents.

- 15. Perceptions of Campus Climate Disaggregated by Race/Ethnicity
- 16. Perceptions of Campus Climate Disaggregated by Gender Identity and Sexual Orientation
- 17. Perceptions of Campus Climate Disaggregated by Graduate Degree Type

d. All nonconsensual contact through force, threat of violence, or when the respondent was asleep, unconscious, or unable to resist or respond. (Any respondent in row a, b, and/or c)	187	8.7%	37	1.6%	14	15.4%	71	3.9%	17	0.7%	*	*	329	3.6%

^{*}Results suppressed because of small numbers to protect the privacy of respondents.

⁴⁷ This table is provided in response to requests for a total measure of nonconsensual contact accomplished through force, threat of violence, or when the respondent was asleep, unconscious, or unable to resist or respond, independent of Stanford's categorization of responses into the policy categories of sexual assault and sexual misconduct. This table includes respondents indicating experiences of nonconsensual kissing, which is not considered prohibited sexual contact under Stanford's policy, but may constitute sexual harassment.

⁴⁸ We use the term *gender diverse* to describe respondents who selected the following responses when asked their gender identity on the survey: *female to* male transgender or trans man, male to female transgender or trans woman, genderqueer/gender-nonconforming, I prefer another term, and/or selected multiple identities.

Table 6B: Undergraduates in 4th Year and Above

All nonconsensual sexual contact accomplished through the tactics of force, threat of violence, or when the respondent was asleep, unconscious, or unable to resist or respond. Respondents appear in both rows a and c if they indicated experiencing both kinds of incidents. Row b is a subset of row a; row b includes completed acts only. Row d counts each survey respondent only once.

		Under	graduate 4th Year	and Above ⁴⁹		
	Women (N= 585)			en (N= 630)	Gender Diverse	(N= 23)
	N	%	N	%	N	%
a. Penetration without consent; oral sex without consent; being made to penetrate without consent. Includes both completed acts and attempted acts. b. Penetration without consent; oral sex without consent; being made to penetrate without consent. Includes completed acts only.	41	7.0% 5.3%	8	1.3%	*	*
c. Kissing, touching, and clothing removal.	61	10.4%	12	1.9%	*	*
d. All nonconsensual contact through force, threat of violence, or when the respondent was asleep, unconscious, or unable to resist or respond. (Any respondent in row a, b, and/or c)	68	11.6%	15	2.4%	*	*

^{*}Results suppressed because of small numbers to protect the privacy of respondents.

⁴⁹ Respondents are included in the category 4th Year and Above if they selected Fourth or Fifth+ on the survey when asked What class year are you?

7. Concerns about Sharing or Reporting Experiences of Nonconsensual Sexual Contact

Table 7: Did any of the following thoughts or concerns cross your mind when you were deciding whether or not to share or report your experience? (Regarding each respondent's most recent experience of nonconsensual contact)⁵⁰

		onconsensual Per Sex (Attempted o		Completed Nonconsensual Touching or Clothing Removal ⁵¹			
	N	Percent responding <i>Yes</i>	Percent responding <i>No</i>	N	Percent responding <i>Yes</i>	Percent responding <i>No</i>	
Did not know who I should tell	483	42%	58%	1,033	21%	79%	
Did not know where to go to report	481	23%	77%	1,032	15%	85%	
Did not want anyone to know the other things I was doing at the time (e.g., drinking underage, using drugs)	481	22%	78%	1,034	12%	88%	
Felt embarrassed or ashamed, didn't want anyone to know what happened	481	65%	35%	1,032	30%	70%	
Felt that I was at least partly at fault or it wasn't totally the other person's fault	481	78%	22%	1,031	47%	53%	
Afraid of retaliation by person who did it or others	477	35%	65%	1,029	14%	86%	
Not clear that harm was intended	481	76%	24%	1,031	72%	28%	
Did not think it was serious enough to share	478	77%	23%	1,032	89%	11%	
Lack of proof that incident happened	480	41%	59%	1,031	27%	73%	

⁵⁰ The list of concerns shown to respondents was long and there was some drop-off in response for later items. The statements are presented here in the same order as on the questionnaire. The N column shows the total answering either Yes or No to each statement.

⁵¹ Respondents who experienced both nonconsensual penetration/oral sex and nonconsensual touching/clothing removal are represented here only in the column for nonconsensual penetration/oral sex. Those in the column for nonconsensual touching or clothing removal did not also experience nonconsensual penetration/oral sex.

		onconsensual Per Sex (Attempted		Completed Nonconsensual Touching or Clothing Removal ⁵¹			
	N	Percent responding Yes	Percent responding <i>No</i>	N	Percent responding Yes	Percent responding <i>No</i>	
Table 7 Continued							
Fear of being treated with hostility by the person I would tell	478	26%	74%	1,030	10%	90%	
Fear of being blamed or not believed by the person I would tell	479	37%	63%	1,029	14%	86%	
Fear of how my family would respond	479	36%	64%	1,027	12%	88%	
Did not want the person who did it to get into trouble or hurt their future	479	57%	43%	1,019	31%	69%	
Did not want any action to be taken (i.e. arrests, legal charges, disciplinary action)	478	75%	25%	1,021	55%	45%	
Felt that the other person was too powerful to be held accountable	478	11%	89%	1,024	3%	97%	
Didn't think the Stanford University administration would do anything	480	34%	66%	1,023	22%	78%	
Worried that if I tell someone at Stanford University, the administration will take action against the entire organization/group that this person belongs to, rather than just the person who did something wrong	478	15%	85%	1,019	12%	88%	
Worried that if I tell someone at Stanford University, the administration will take action on their own without my permission	477	46%	54%	1,015	23%	77%
